BRUDERER 10t Mini Precision Punching Press

- Small tonnage precision straight side press
- Adjustable stroke for job versatility
- Used as free standing or table mounted
- Totally inclinable for horizontal applications
- Adjustable stroke 6 – 38 mm
- Feed metal , paper, and other thin films

The 10 Ton Mini boasts outstanding features for small tonnage applications. This very compact and extremely well engineered punching press is used for example in the plastic film and razor blade industries. Actually, the applications are unlimited, but a few more examples are contact welding lines, manufacture of intricate miniature components for the surgical electronic industries, and precision processing of thin cardboard.

Everything about the 10 Ton Mini says BRUDERER. The single-rod machine with transverse shaft drive and proven ram guiding system is your guarantee of maximum tool life. The ductile cast iron housing, which is screwed together with rods and base plate, lends the punching press outstanding rigidity for constant parts quality. The six freely-adjustable stroke lengths from 6 – 38 mm to ensure maximum flexibility for a wide area of application. BBV/BSV and BZV type feed units can be mounted on the left or right.

Model	Press force (kN)	Tool Loading Area L - R (mm)	Bolster Area L		Adjustable Stroke (mm)	Weight approx. (kg)
			- R x F- B (mm)	Max. Speed (SPM)		
10 Ton Mini	90	320	368 x 279	500	6 - 38	1133
10 Ton Mini	90	372	419 x 279	400	6 - 38	1270
